

RATCHET CLAMPS

PERLANE SALES, INC

The Ratchet Clamp offers a reusable design that reduces inventory, accelerates fastening, and streamlines maintenance. Specifically designed for heavy equipment manufacturing, it effectively addresses wire bundling difficulties in solar installations, automotive, and other OEM applications.

These versatile clamps easily adapt to bundle sizes and come with integrated mounts, eliminating the need for extra hardware across various applications.

Versatile

- Self-mounting
- Universal
- No bracket required
- No mounting hole needed

Ease of Use

- One-piece design
- Effortless clamp release
- Precision tensioning
- Pre-install

Durability

- Robust clamp material
- Heavy duty base
- Tough, built-in mounting
- Strong bond

Alignment

- Bundle, secure, and route with one part
- 1 clamp, 2 routings
- Contoured clamp interior
- Resist sliding

HellermannTyton

Impact modified, eat and UV stabilized PA66 plastic ensures long-term durability.

Contoured clamp interior is designed to guide and center bundle to reduce pinching.

Interior rib design minimizes movement due to vibration.

Integrated cable tie saddle allows attachment of additional bundle.

One-piece ratchet closure allows for easy installation one-touch close.

Screwdriver release enables easy adjustments zinc maintenance.

Tension tabs slide through this slot to facilitate closure using an EVO Series hand tool.

Choice of attachments available: round or oval fir tree offer high extraction and low insertion forces; adhesive option is ideal where no mounting hole exists.
